NATIONAL MEASURES AND EXCELLENT ORGANISATIONS, ATTRACTING RESEARCHERS FROM ABROAD

- **The Science Fund of the Republic of Serbia** is a public organisation that supports science and research. Programmes support technological development, advanced and innovative ideas, the development of human resources, laboratories and scientific infrastructure, integration into international science trends, cooperation between science and industry, and other topics that are of strategic and social significance.

- **The Innovation Fund of the Republic of Serbia** contributes to the overall development of the innovations through various financial aid instruments, particularly by fostering the establishment of new companies and strengthening existing companies, by positioning them to access venture capital markets, and by attracting foreign direct investment in high-tech research and development.
The Science Technology Park Belgrade is a partnership between the Republic of Serbia Government, the City of Belgrade and the University of Belgrade. STP Belgrade has become a new business core of the city that brings together dozens of high-tech development companies/teams by providing different programmes and activities, and plays an essential role in developing the innovation ecosystem in Serbia.

The H2020 funded Project ANTARES aims to evolve BioSense Institute from Serbia into a European Centre of Excellence (CoE) for advanced technologies in sustainable agriculture. ANTARES aims to boost the human and material resources of the new CoE in carefully selected research fields, to enable it to create scientific breakthroughs and sustain excellence across a range of topics. In regards to human resources, this involves hiring exemplary senior research leaders with the aim of injecting specific scientific expertise as well as an innovative attitude into the Institute’s culture.
Welcome to the land of great cultural wealth, where nature is just as tame as it is wild, and where beautiful cities have irrevocably entwined the East and the West for centuries. Come, explore Serbia, its cities, unique natural beauty, old monasteries, archaeological sites, the remains of the Roman Empire, castles, châteaux, spas, ethno villages and many other things. Indulge your senses with superb Serbian cuisine. Feel the burst of energy at some of the most exhilarating music festivals in Europe, and experience a unique nightlife that usually lasts until the early morning hours. The capital, Belgrade, is a city which lies near two rivers. The view of the confluence of the rivers Sava and Danube from the Kalemegdan in the sunset is simply breathtaking.
