About Individual Fellowships

The goal of the Individual Fellowships is to enhance the creative and innovative potential of experienced researchers of any nationality, wishing to diversify their individual competence in terms of skill acquisition through advanced training, international and intersectoral mobility. There are two types of Individual Fellowships:

- European Fellowships (open to researchers moving within Europe, as well as those coming in from other parts of the world)
- Global Fellowships (fund positions outside Europe for researchers based in the EU or associated countries)
