

FELLOWSHIP OPPORTUNITIES WITH A WORLD LEADING SCIENCE FOUNDATION IRELAND AGRI-TECH RESEARCH CENTRE

VistaMilk is actively seeking applications from excellent candidates for the 2020 Marie Sklodowska Curie Fellowship call

VistaMilk welcomes applications from experienced researchers across all strands of the Marie Sklodowska-Curie Individual Fellowships scheme. To secure funding, the candidate must develop a proposal with a supervisor from the host Institute of their choice by 9th September 2020.

The objective of the VistaMilk SFI Research Centre is to generate and deploy innovative basic and applied science and technologies to better understand and monitor the complex interactions across a highly inter-dependent food-production chain. The objective is achieved by exploring 3 inter-dependent thematic areas (i.e. Pasture, Cow and Food) bringing together expertise in the biological sciences, sensor-systems, communications and networking, data analytics, and food processing.

VistaMilk research programme encompasses (*further detail overleaf*):

PASTURE: Soil nutrient dynamics, Sustainable pasture management and production, Pasture breeding programmes

COW: Animal nutrition and fertility, Animal Health and Diseases Diagnostic, Sustainable and accurate animal breeding programmes

FOOD: Next generation dairy processes and products, Digestive characteristics of dairy products and ingredients, Nutrifunctional Milk and health benefits for humans.

AGTECH: Advanced Sensors & Systems Integration, Communications and Networks, Data, Privacy & Warehousing, Data Analytics, -omics, Test-Beds, Integration and deployment

Researcher eligibility:

We are seeking excellent postdoctoral candidates in all VistaMilk-related disciplines. The researcher must fulfil the Marie Curie – Individual Fellowship mobility and experienced researcher requirements as detailed in the [Guide for Applicants](#).

If you are interested, please contact guillaume.lepalud@teagasc.ie or any one of our researchers listed overleaf

VistaMilk research topics

Host institution and supervisors

- Nano and Molecular Communications
- Internet of (Nano) Things
- Bio-inspired Communication systems
- 5G Terahertz communications

Dr Sasitharan Balasubramaniam - Telecommunication Software and Systems Group, Waterford Institute of Technology.

Sasitharan has graduated 7 PhD students, and is currently supervising 5. He is also supervising 3 postdoctoral research fellows, including one Marie-Curie EDGE fellow.

[Google Scholar](#)

- Forages
- Plant reproductivity traits
- Cytoplasmic male sterility
- Abiotic stress
- Herbicide resistance

Dr Susanne Barth - Teagasc, Crops Research Centre, Oak Park, Carlow.

Dr. Barth has previously supervised 3 contract researchers, 2 technicians and 14 PhD students.

[ORCID](#)

- Animal genetics and genomics
- Decision support
- Phenotypes
- Genetic evaluations
- Genomic predictions

Prof Donagh Berry - Teagasc Animal & Grassland Research and Innovation Centre, Moorepark.

Donagh Berry currently mentors 5 post-doc and 7 PhD students as primary supervisor. He successfully supervised 28 students and 6 post-docs to completion.

[Google Scholar](#)

- Soil microbiome
- Plant-soil-microbial interactions
- Greenhouse gases
- Nutrient cycling
- Enteric pathogens

Dr Fiona Brennan- Teagasc Crops, Environment and Land Use Programme, Johnstown.

Dr Brennan has supervised 3 PhD and 1 MSc students to completion. Currently her team consists of a technologist, a technician, 2 postdoc researchers, 1 Msc and 7 PhD students.

[Google Scholar](#)

- Nutrigenomics
- Metabolomics
- Personalised Nutrition

Professor Lorraine Brennan - Institute of Food and Health, University College Dublin.

Professor Brennan has supervised 14 PhDs to completion. Her current team consists of 5 PostDocs, 3 Research Assistants, 1 PhD student and 1 Research Manager.

[Google Scholar](#)

- Food digestion
- In vitro/in vivo digestion
- protein chemistry
- food colloids
- Microencapsulation

Dr André Brodkorb - Teagasc Food Research Centre, Moorepark.

Dr Brodkorb currently supervises 5 post-doctorates and 4 PhD students with 8 previous post-docs and 11 PhD students; 1 successful Individual MSC Fellowship in 2019 call.

[Google Scholar](#)

- Reproduction
- Nutrition
- Physiology
- Genetics and Sexed semen
- Fertility Management

Dr Stephen Butler – Teagasc Animal & Grassland Research and Innovation Centre, Moorepark.

Dr Butler has supervised 3 post-doc researchers, 8 PhD students and 2 Msc students to completion. Currently, he supervises 2 post-doc researchers and 4 PhD students

[Research Gate](#)

- Forage grass and legume breeding.
- Genome analysis
- Comparative genomics

Dr Stephen Byrne- Teagasc, Crops Research Centre, Oak Park, Carlow.

Dr. Byrne is a former MSCA fellow himself and has supervised/co-supervised 4 PhD Students and several technicians and research assistants. He Currently supervises 1PhD student, and 1MSCA fellow

[ORCID](#)

- Fermented food microbiology
- Food chain microbiome
- Modulating gut microbiome for health improvements
- Next generation DNA sequencing

Dr Paul Cotter - Teagasc Food Research Centre, Moorepark.

Dr Cotter has supervised 24 PhDs and 10 MScs to completion and currently supervises 9 Post-docs/research fellows, 11 PhD students and 2 technicians.
